[Semiconductors](#)> [Monde](#)> [Conjoncture](#)> [Etude de marché](#)> 10/03/2009 12:48:03:

According to Semico Research, the low level of stocks of **semiconductors** suggests a rapid recovery when demand picks up, for hours, the research company predicts a decrease of 15% of global semiconductor market this year to 213 billion dollars, before a rebound of 13% in 2010 to 244 billion and growing without interruption until 2013 when the market would be 330 billion dollars.
